## See your fleet like never before

Track aircraft on ground events across your entire operation. Understand patterns by type, age, and route to make decisions that matter.

[Start](#)[Learn](#)**Capabilities**

### What sets us apart

Real data. Real time. Real answers.

**Monitor**

#### Real-time aircraft on ground monitoring

Watch every AOG event as it happens across your fleet operations.

[Explore >](#)**Visualize**

#### Fleet-wide data visualization by attributes

See patterns emerge when you filter by aircraft type, age, and operational routes.

[Explore >](#)**Report**

#### Customizable reporting tailored to you

Build reports that speak to your operation. Slice the data how you need it.

## The numbers that matter to your operation

**50K+**

AOG events tracked

**200+**

Aircraft types covered

**180+**

Countries monitored

**Process**

### Three steps to fleet clarity

Connect your data sources to Analize360. The platform ingests real-time AOG events from your operations. Watch the data flow in.

**★★★★★**

"We went from guessing about AOG patterns to knowing exactly where our problems were. The data visualization alone saved us weeks of manual analysis."

James Mitchell  
Operations director, regional carrier**Connect your data**

Link your systems and let Analize360 pull the AOG information automatically.

**Filter and analyze**

Slice your fleet by type, age, and route to find what matters most.

**Act on insights**

Use the patterns you find to reduce downtime and improve your operation.

## What they say

Analize360 changed how we see our fleet.
